

Anatoliy Razumovskyi

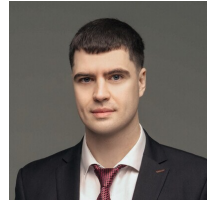

Full-Stack Developer

Chisinau, Moldova • Citizenship: Ukraine • Age: 35 • nepsterwm@gmail.com

Telegram: t.me/nepsterweb

LinkedIn: linkedin.com/in/arazumovskyi

GitHub: github.com/nepster-web

Full-Stack engineer with 15+ years of experience. I own the full cycle of building a web product: from requirements and architecture to the backend and the frontend. I write code that is readable, maintainable and scalable. I have worked with high loads, large codebases and startups from scratch, and led cross-functional teams. I take tasks from discussion to stable production. Since 2025 I use AI tools every day (my favorites: Codex and Claude Code).

WORK EXPERIENCE

Full-Stack Developer / Senior PHP Developer

under NDA

10.2023 — present

European product company in marketing (name under NDA).

Working on a commercial product as a full-cycle engineer: from requirements-level task definition to design, implementation, optimization and support. Details are under NDA.

Technologies: PHP 7.x, PHP 8.x, Symfony, MySQL, ClickHouse, Redis, Memcached, RabbitMQ, React.js, Gitflow, Kubernetes

Full-Stack Developer, Team Lead

Neodice

09.2020 — 05.2022

As Team Lead of a six-person team, developed a gambling startup from scratch: chose the stack, designed the architecture, wrote the bulk of the code and distributed tasks between the backend developer, frontend developer, QA and DevOps. Together with the manager, carried out RNG certification: implemented the algorithm and met the code compliance requirements. After the market launch, supported the project and built up protection against bonus hunters, including the KYC process, semi-automatic payouts and more.

Technologies: PHP 8.x, Mezzio, PostgreSQL, Redis, Vue.js, Nuxt.js, Gitflow, GCP, TypeScript, HTML / CSS (scss)

Full-Stack Developer, Team Lead

Travellizy

02.2017 — 05.2022

A travel platform with a wide coverage of destinations: from developer to Team Lead and system architect. Designed the platform architecture on DDD with dedicated services, a GraphQL API and RabbitMQ, integrated external services and partner APIs, wrote the core of the system. Led a team of up to 10 people: planned the work and set tasks, ran code reviews, wrote technical documentation, hired and onboarded new developers, built the development processes.

Technologies: PHP 7.x, PHP 8.x, Mezzio, Symfony, Laravel, DDD, PostgreSQL, GraphQL, RabbitMQ, Redis, Nginx, Gitflow, Docker, Vue.js, Nuxt.js, TypeScript, HTML / CSS (scss)

Full-Stack Developer

Re-bit Digital

02.2016 — 12.2016

Outsourced development for external clients: maintained and improved existing web projects, fixed bugs, optimized performance. Learned to quickly navigate unfamiliar codebases and work on several projects with different frameworks in parallel.

Technologies: PHP 5.x, PHP 7.x, Yii, Zend, Laravel, Symfony, MySQL, Redis, Memcached, Nginx, Apache2, HTML / CSS (scss), JavaScript (jQuery, Gulp)

Full-Stack Developer / Middle PHP Developer

KARAT LLC

11.2013 — 09.2015

Worked on a housing rental classifieds site. The codebase was early PHP, with logic, markup and database queries mixed together. Made the case to management for a full rewrite instead of patching, and built the product from scratch on a new framework-based architecture, integrated payment solutions and brought it to launch. Over two years of development the

project grew into a large codebase; led two developers who joined along the way.

Technologies: LEMP stack, PHP 5.x, Yii, MySQL, HTML / CSS (less), JavaScript (jQuery, Grunt), Node.js, Memcached

Full-Stack Developer / Junior PHP Developer

Increase Ukraine

08.2012 — 09.2013

Digitalized the business of a network marketing company: developed a web service to replace manual processes, automated the business logic, integrated payment systems, launched and supported the project. Worked alone until the middle of the project, then led a second developer who joined.

Technologies: LEMP stack, PHP 5.x, Yii, MySQL, HTML / CSS, JavaScript (jQuery)

Web Master, Intern PHP Developer

Freelance

09.2007 — 05.2012

Started as a web master: administered CMS-based sites, handled content and advertising, while learning PHP and writing simple scripts on the side. Then developed small presentation sites for sales representatives in network marketing and advertising.

Technologies: cms-DLE, LAMP stack, PHP 5.x, CodeIgniter, MySQL, HTML / CSS, JavaScript (jQuery)

SKILLS

Backend

PHP 8.x, Node.js, Bash

PHP: Composer, CLI, PHPUnit, PHPStan, PHP CS Fixer, Symfony, Laravel

Node.js: npm, Express, Socket.IO, Jest, ESLint

Storages: PostgreSQL, MySQL, Redis, Memcached, ClickHouse, Elasticsearch

Frontend

HTML, CSS (scss, less, postcss), JavaScript, TypeScript, Tailwind CSS

Frameworks: Vue.js, Nuxt.js

Infrastructure: Docker, Nginx, Ansible, CI/CD, Git, Gitflow, Kubernetes

Approach: DDD, SOLID, GRASP, YAGNI, KISS, DRY

AI in development: Code generation & review, AI integration into projects, AI automation

Domain experience: E-commerce, Marketing / CRM, Gambling, Affiliate, Cryptocurrency, Travel, Classifieds, Education

Also worked with: PHP 5.x, PHP 7.x, Mezzio, Laminas (Zend), Yii, CodeIgniter, REST API, GraphQL, jQuery, React.js, Materialize, Bootstrap, Apache2, LAMP, LEMP

EDUCATION

Master's degree in IT project management — Odesa Polytechnic National University (09.2020 — 12.2021)

Bachelor's degree in computer science — Odesa Polytechnic National University (09.2016 — 06.2020)

Bachelor's degree in marketing — University "Ukraine" (09.2008 — 09.2012)

TALKS

RAD vs ENTERPRISE — DevConf 2019, Moscow

PSR — a bit more than code style — CODEiD 2019, Odesa

Organizing CSS code and one more methodology — OdessaFrontend 2018

A fresh take on API development — CODEiD 2017, Odesa
